

## Berlin Knurled Cupboard Knob

AW841

The **Alexander & Wilks Berlin Knurled cupboard knob** perfectly juxtaposes traditional and industrial styles with an **elegant flared stem** and soft-edged face, contrasting with the **industrial knurled** circumference of the knob. Flared stems are synonymous with **classic sophisticated** design styles, while **knurling** is an **industrial** method of fixing cosmetic damage while maintaining its practicality. Now Knurling is an incredibly popular **tactile** feature, perfect for **modern and midcentury homes**.

Named **Berlin** after the city that blends **modern and traditional** so well, this on-trend cabinet knob is perfect for kitchens with depth or **wardrobe and cupboard refresh projects**, which make it possible to change the whole style of a room with a lick of paint and some hardware swaps.
