

Freestanding Portable Door Stop

AW605-grp

The **Alexander and Wilks** portable **free-standing** door stops are satin chrome and are available in three sizes. As these door stops are portable they can be placed wherever you wish to hold the door open or prevent it from banging into a wall.

It is a **solid brass** door stop in a fresh and **contemporary** satin chrome finish, with a rubber ring around the circumference to cushion the door and a rubber base to help stop it from slipping.

This **freestanding** door stop from **Alexander and Wilks** is particularly useful for tiled floors, underfloor heating situations, and other areas where fixing would be difficult.
